### Features

### Benefits

Asymmetric tread design

Provides excellent performance during varied winter conditions

Three wide circumferential tread grooves

Help evacuate water, slush and packed snow while maintaining maximum contact with the road

Unique lateral cross-cut grooves

Effectively disperse water and slush and provides more biting angles for improved snow and ice grip

Sunflower oil enriched compound

Increases low temperature traction for improved wet braking and handling, and better snow performance

Ultra high performance platform design

Provides the handling and precision demanded by owners of ultra high performance sports cars, sedans, or coupes during winter conditions
